Our Philosophy

Our mission is to educate the human potential. We utilize multiage groupings which allow teachers to develop long lasting relationships and to understand each child's different learning style. It also allows older students to become role-models which helps them to develop leadership skills. They are mentors to younger students who aspire to be like them. The curriculum materials are specially designed for a multi-sensory learning experience. They are self-correcting which need minimal teacher intervention. This develops a child's self-esteem

...and each child's beautiful spirit.

Arbor Creek MONTESSORI

Nurturing the Spirit of the Child
